DETAILED ACTION

Status of Claims

Claims 1 and 2 are withdrawn, Claims 3-7 and 9 are currently amended and Claim 8 is cancelled.

Substitute Specification

The Substitute Specification filed in this application on June 4, 2009 has been entered.

Priority

It is noted that this application appears to claim subject matter disclosed in prior Application No. PCT/CN04/00308, filed 04/05/2004. A reference to the prior application must be inserted as the first sentence(s) of the specification of this application or in an application data sheet (37 CFR 1.76), if applicant intends to rely on the filing date of the prior application under 35 U.S.C. 119(e), 120, 121, or 365(c). See 37 CFR 1.78(a). For benefit claims under 35 U.S.C. 120, 121, or 365(c), the reference must include the relationship (i.e., continuation, divisional, or continuation-in-part) of all non-provisional applications. If the application is a utility or plant application filed under 35 U.S.C. 111(a) on or after November 29, 2000, the specific reference to the prior application must be submitted during the pendency of the application and within the later of four months from the actual filing date of the application or sixteen months from the filing date of the prior application. If the application is a utility or plant application which entered the national stage from an international application filed on or after November 29, 2000,

after compliance with 35 U.S.C. 371, the specific reference must be submitted during the pendency of the application and within the later of four months from the date on which the national stage commenced under 35 U.S.C. 371(b) or (f) or sixteen months from the filing date of the prior application. See 37 CFR 1.78(a)(2)(ii) and (a)(5)(ii). This period is not extendable and a failure to submit the reference required by 35 U.S.C. 119(e) and/or 120, where applicable, within this time period is considered a waiver of any benefit of such prior application(s) under 35 U.S.C. 119(e), 120, 121 and 365(c). A benefit claim filed after the required time period may be accepted if it is accompanied by a grantable petition to accept an unintentionally delayed benefit claim under 35 U.S.C. 119(e), 120, 121 and 365(c). The petition must be accompanied by (1) the reference required by 35 U.S.C. 120 or 119(e) and 37 CFR 1.78(a)(2) or (a)(5) to the prior application (unless previously submitted), (2) a surcharge under 37 CFR 1.17(t), and (3) a statement that the entire delay between the date the claim was due under 37 CFR 1.78(a)(2) or (a)(5) and the date the claim was filed was unintentional. The Director may require additional information where there is a question whether the delay was unintentional. The petition should be addressed to Mail Stop Petition, Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450.

If the reference to the prior application was previously submitted within the time period set forth in 37 CFR 1.78(a), but not in the first sentence(s) of the specification or an application data sheet (ADS) as required by 37 CFR 1.78(a) (e.g., if the reference was submitted in an oath or declaration or the application transmittal letter), and the information concerning the benefit claim was recognized by the Office as shown by its inclusion on the first filing receipt, the petition under 37 CFR 1.78(a) and the surcharge under 37 CFR 1.17(t) are not required.

Applicant is still required to submit the reference in compliance with 37 CFR 1.78(a) by filing an amendment to the first sentence(s) of the specification or an ADS. See MPEP § 201.11.

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

The drawings were received on 06/02/2011. These drawings are accepted.

Oath/Declaration

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because it is not in the English language.

Election/Restrictions

Applicant's election with traverse of Group II in the reply filed on 06/02/2011 is acknowledged. The traversal is on the ground(s) that a serious burden has not been placed on the examiner based on MPEP § 803. This is not found persuasive because this application is a national stage entry of PCT/CN04/00308; MPEP § 803 does not apply.

The requirement is still deemed proper and is therefore made FINAL.

This application is in condition for allowance except for the presence of claims 1 and 2 directed to an invention non-elected with traverse in the reply filed on 6/2/2011. Applicant is given ONE MONTH or THIRTY DAYS from the date of this letter, whichever is longer, to cancel the noted claims or take other appropriate action (37 CFR 1.144). Failure to take action during this period will be treated as authorization to cancel the noted claims by Examiner's Amendment and pass the case to issue. Extensions of time under 37 CFR 1.136(a) will not be permitted since this application will be passed to issue.

The prosecution of this case is closed except for consideration of the above matter.

Allowable Subject Matter

Claims 3-7 and 9 are allowed.

As allowable subject matter has been indicated, either applicant's reply must comply with all formal requirements or specifically traverse each requirement not complied. See 37 CFR 1.111(b) and MPEP § 707.07(a).

The following is a statement of reasons for the indication of allowable subject matter: JP 02-130389 teaches a de-slag method by three slag raking-out plates and a de-slag machine as shown below in Figure 1:

第 1 図

However, JP '389 does not teach that the slag rakes are adapted to swing toward each other in order to clamp and scoop up slag as claimed.

JP 2000-227282 teaches a method for top slag raking and removing for molten iron in a converter (see Figure 2 below):

【図2】

The method involves using multiple movable arms that are movable fully of the inner periphery of the molten metal ladle. The blades are arranged to overlap each other and span the entire

surface of the molten metal in the ladle. However, JP '282 does not teach that the slag rakes are adapted to swing toward each other in order to clamp and scoop up slag as claimed.

Mancuso (US 5,360,204) teaches a boom and lance for removing slag from a crucible as shown below in FIG. 1:

However, Mancuso does not teach two slag rakes that are adapted to swing toward each other in order to clamp and scoop up slag as claimed.

Conclusion

This application is in condition for allowance except for the following formal matters:

The oath is defective as stated above, and the priority information needs to be in the first paragraph.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
